

The diagram illustrates a growth cycle with the following components:

- Vertical Axis:** Labeled "GROWTH/CYCLE" with an upward-pointing arrow.
- Horizontal Axis:** Labeled "TEMPERATURE" with a rightward-pointing arrow.
- 1 MONO LAYER:** A horizontal dashed line representing a specific growth state.
- Transitions:** Two vertical dashed lines indicate points of change in the system.
- Regions:**
 - Between the first transition, two lines labeled L_1 and L_2 diverge from the 1 MONO LAYER line.
 - Between the second transition, two lines labeled H_1 and H_2 diverge from the 1 MONO LAYER line.
 - The region between the two transitions is labeled W .
